

Heart Health — Circulation, Endurance & Everyday Vitality Redefined!

An award winning, integrated and synergistic extract of beetroot & pomegranate developed using Bio Active Fusion Technology for nitric oxide production and vascular performance with superior low-dose efficacy.

The Science of a Stronger Heart

Nitric oxide (NO) plays a crucial role in maintaining vascular tone, blood flow, and endothelial integrity. With age, stress, or poor lifestyle habits, NO production naturally declines — leading to impaired circulation and increased cardiovascular strain.

BeepActive supports natural nitric oxide pathways to enhance vasodilation, improve endothelial function, and promote efficient blood circulation, empowering the heart to perform at its best.

Backed by multiple gold-standard clinical studies

● Vasodilation and Endothelial function

Significant improvement in Flow-Mediated Dilation (FMD) observed as early as Day 1, supporting improved endothelial function.

Flow Mediated Dilation

Flow mediated dilation (FMD) is a non-invasive technique used to assess the health of blood vessels. FMD is an indicator of endothelial function and vascular health.

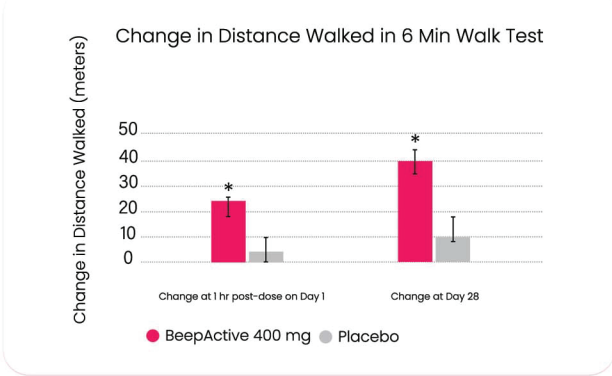

● Nitric Oxide and Blood Flow

Boosts natural NO production, supporting improved blood flow and peak cardiovascular performance.

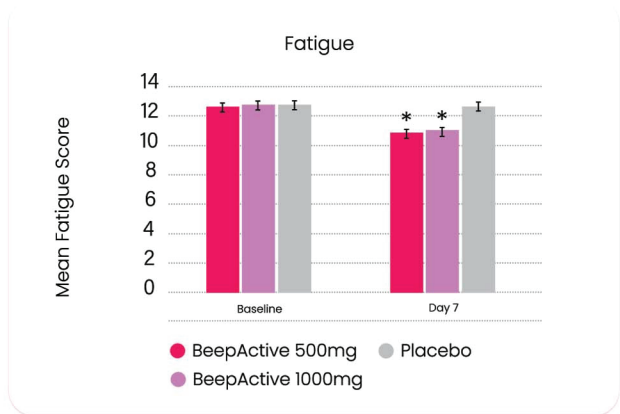

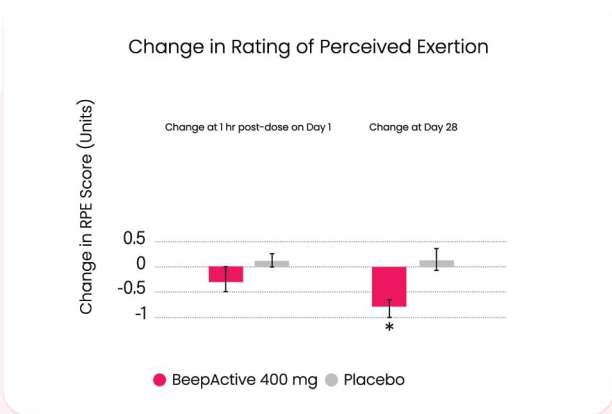

Endurance

Demonstrated significant increase in Endurance as early as day 1.

Overall Fatigue

Demonstrated significant reduction in Physical Fatigue and Perceived Exertion, helping maintain sustained energy and cardiac resilience.

Body Composition

Proven reduction in Fat Mass and Total Fat Percentage, supporting cardiovascular and metabolic wellness.

Dosage: 400-500mg

BeepActive™

Supported by two robust clinical studies, BeepActive enhances vasodilation, nitric oxide levels, and blood flow, improving endurance, stamina, and muscle strength while reducing fatigue, feeling of exertion, and body fat. By supporting improved circulation and endothelial function, it offers a holistic, plant-based solution for cardiovascular health and everyday vitality.
