

Sports & Active Nutrition – Endurance, Vitality and Everyday Energy Redefined!

An award winning, integrated and synergistic extract of Beetroot and Pomegranate, developed using Bio Active Fusion Technology to enhance nitric oxide production, circulation, and muscle performance with superior low-dose efficacy.

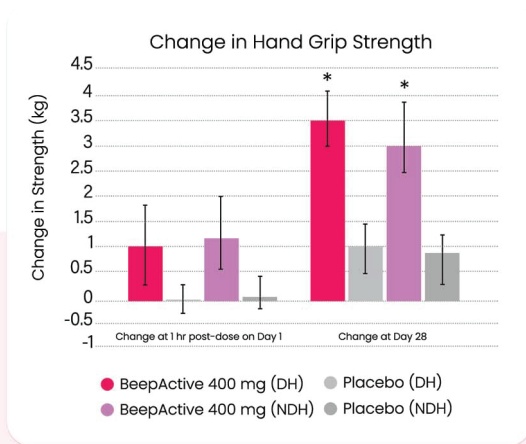

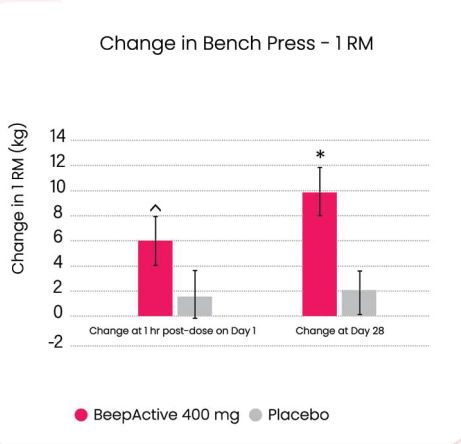

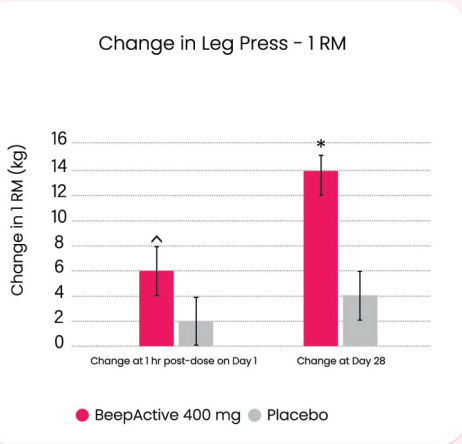

Fueling Peak performance

Performance whether in competitive sports or everyday activity depends on the body's ability to deliver nutrients efficiently to muscles. BeepActive supports endurance, enhances muscle strength, promotes nitric oxide driven blood flow, reduces fatigue, and supports healthy body composition empowering both athletes and active individuals to perform better, stay energized, and recover faster.

Backed by multiple gold-standard clinical studies

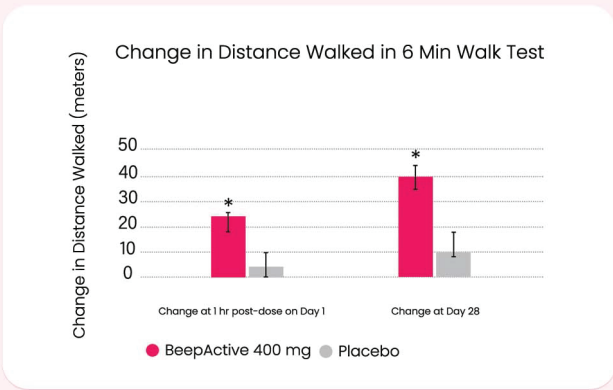

Muscle Strength

Demonstrated increased Upper Body, Lower Body and Hand Grip Strength, supporting enhanced athletic performance and resilience.

Endurance

Demonstrated significant increase in 6-Minute Treadmill Walk Test, with improvement observed as early as Day 1.

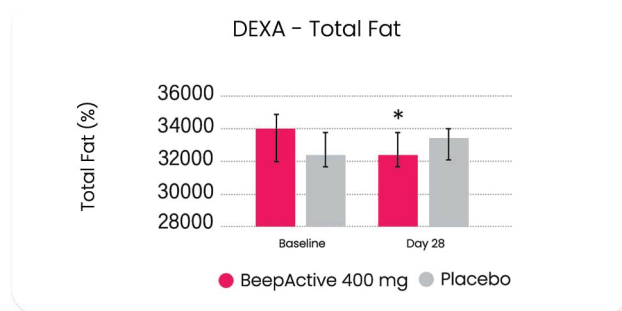

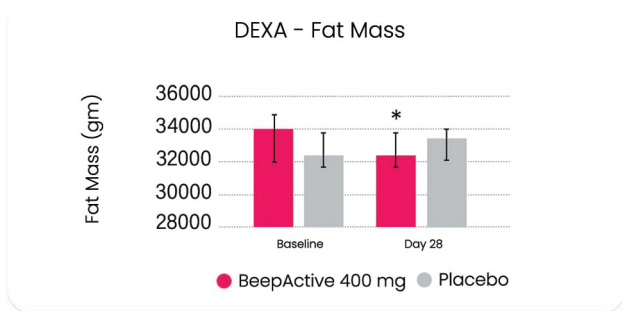

Dosage: 400-500mg

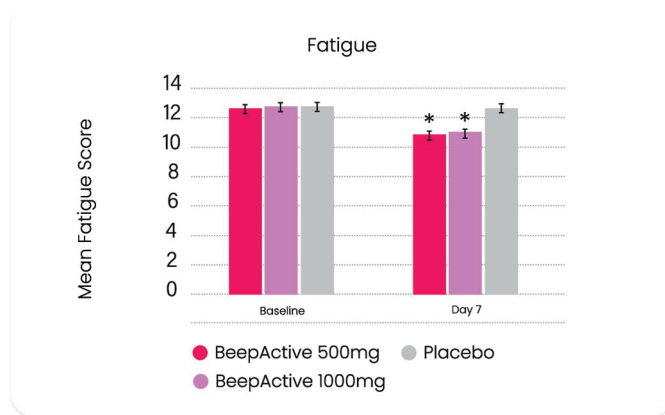

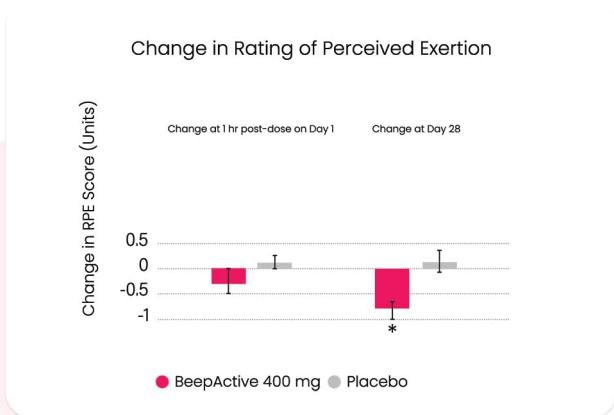

Body Composition

Demonstrated reduction in Fat Mass and Total Fat percentage, supporting metabolic health and overall performance in active individuals and athletes.

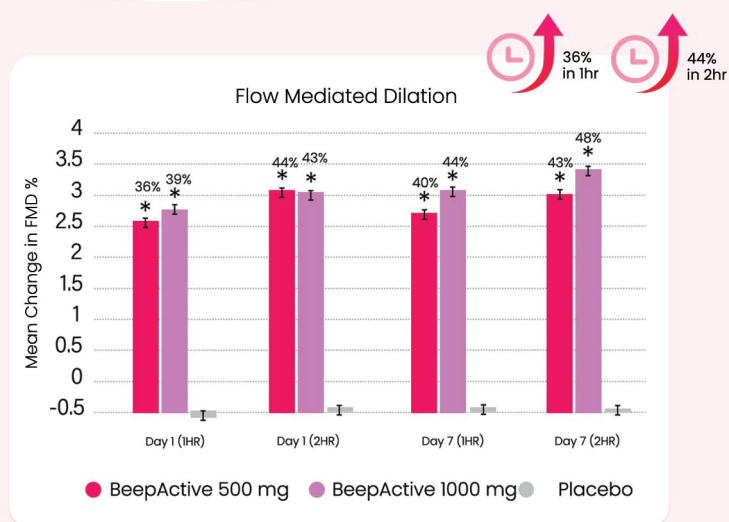

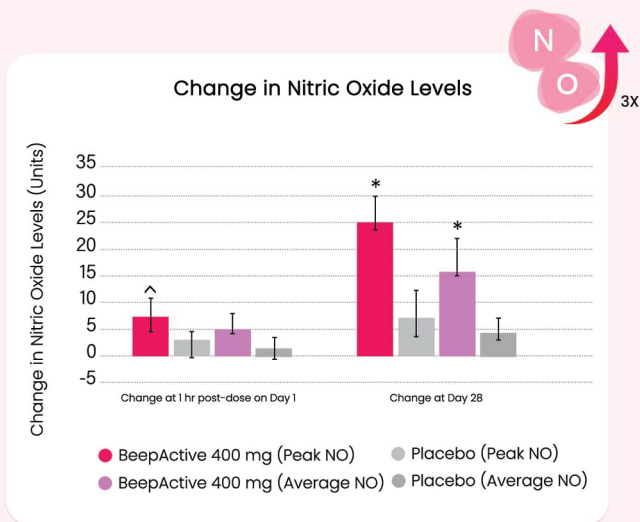

Reduced Fatigue & Perceived Exertion

Demonstrated significant reduction in Physical Fatigue and Perceived Exertion, helping sustain energy throughout the day.

Nitric oxide & Vasodilation

Boosts natural NO production, supporting improved blood flow and peak cardiovascular performance.

BeepActive™

Supported by two robust clinical studies, BeepActive has shown to enhance vasodilation, nitric oxide levels, & blood flow velocity, key drivers of athletic performance. It significantly improves endurance & muscle strength, while reducing fatigue, perceived exertion, fat mass, & total body fat percentage. Clinically validated & well tolerated, BeepActive offers a safe, plant-based solution to support peak performance, sustained energy, & active living.
